

Wxline Equipment Indoor Bulkhead With Personal Computer

The Wxline Personal Computer (PC) is factory-installed into the standard Wxline Equipment Indoor Bulkhead (WxEIB) to provide a fully integrated base installation of the Strike Guard Lightning Data Receiver, WAVE Transmitter, and Strike View Software. The industrial touch-screen flat panel PC operates Strike View Software in the Linux operating system. The PC is dedicated to running Strike View reliably and it eliminates the need for the end-user to provide a workstation. The WxEIB with touch screen PC provides an Ethernet connection port to allow workstations on your Local Area Network (LAN) to access Strike View remotely.

The WxEIB with PC features a clear viewing window that allows the user to monitor the status of the WAVE Transmitter without opening the enclosure. An integral speaker provides for audible notification of lightning mode changes. Strike View generated email notifications are sent directly from the Wxline PC to the recipients via an email server. The simplified installation leaves the end-user with an attractive, fully integrated package built for reliability, durability, and convenience.

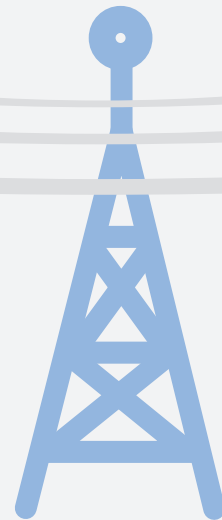

THE WxEIB WITH PC DELIVERS:

- Simplified field installation of your Strike View Server
- Best-practices lightning protection for Wxline components
- External antenna, power and Ethernet™ connections
- Liquid-tight connectors for fiber cable in/out penetrations
- Attractive fiberglass enclosure with clear viewing window
- Simple, user-friendly wall-mount installation
- Plug and Play functionality
- Optional Wi-Fi-based connectivity to LAN

SPECIFICATIONS:

ENCLOSURE: NEMA 4X fiberglass with clear viewing window
SIZE: 20 inches X 16 inches X 8 inches, 30 pounds
PC INTERFACE: 1024 X 768 high resolutions and 450 nits high brightness
ELECTRICAL PROTECTION: 120 VAC or 240 VAC surge arrester (specify)
RF PROTECTION: PolyPhaser® RF surge arrester
POWER SUPPLY: DIN rail mounted, Input: 100-240 VAC; Output: 15 VDC, 4.0 Amp
SAFETY APPROVALS: UL, TUV, CE
CONNECTIONS: Coaxial antenna cable, Ethernet™ port, and fiber-optic cable in/out to equipment
FANLESS SYSTEM: Touch screen PC is designed with an Intel Atom platform
